

ABV12S, 14S and 20S ACTUATED WRAS BALL VALVE

FEATURES

The 304 stainless steel WRAS approved 2-way full flow ball valve ABV12-20S provides the automatic shut-off function for pipeline systems for water. It is WRAS, CE, UKCA, PED, EMC and RoHS approved. The ISO 5211, F03, F05 mounting pad enables the actuator to be directly mounted, saving space and time. The ABV12S, 14S and 20S are 12 months guarantee up to 70,000 operations (Our in house 1 minute cycle dry destruction test achieved 977,762 cycles) and are IP67 protected for installation indoors or outdoors under shelter. Optional Failsafe Return via capacitor and precise modulating control (4-20mA, 0-10v or 0-5v).

AVAILABLE MODELS

304 stainless steel body

G thread connections (option NPT)

WRAS EPDM/PTFE or FKM/PTFE

Supply voltages: 12-24vDC and 110-240vAC.

LIMITS OF USE

Media Pressure:	10 Bar
Media Temperature:	0°C to +90°C
Ambient Temperature:	- 15°C / + 60°C
Duty Cycle	100 %
Actuation Time Fully Closed – Fully Open	11 Seconds Max

DIRECTIVES AND MANUFACTURING STANDARDS

ISO5211 standard F03, F05	EMC Electromagnetic compatibility Test standards, EN55032-2015, EN55035-2017, EN61000-3-2:2014, EN61000-3-3:2013
Pressure Equipment Directive 2014/68/EC	
Low voltage directive 2014/35/EU	
WRAS Approval number 2012107	CE approval test standards EN61000-6-3:2007 +A1:2011, EN61000-6-1:2007
IP67 test standards EN60529:1991+A1:2001	RoHS Directive 2011/65/EU recasting 2002/95/EC

ABV12S, 14S and 20S ACTUATED WRAS BALL VALVE

ABV12S-ABV14S-ABV20S ELECTRIC MOTOR ACTUATOR

The ABV motor actuator proposed as standard comprises:

- IP67 plastic housing for actuator and steel gear box,
- a safety coefficient of 1.3 minimum compared to the nominal torque of the valve,
- an upstream / downstream pressure difference $\Delta P=10$ bar max.
- Thermal protection of the motor
- The actuator's assembly is ISO5211 direct mount.

Power consumption with mains water 20°C at 4 Bar Pressure

Voltage	Actuator Function	Torque NM	Power			Position switches Max applied Voltage / Current	Standard Equipment
			Start	Operating Watts	Static Watts		
12vDC	Failsafe	27	3.3A	9.96W	0.18	36vDC / 0.4A	2-wire control with failsafe capacitor return (Min 30sec recharging required) 2x limit switches
24vDC	Failsafe	24.1	1.2A	10.32	0.288	36vDC / 0.4A	2x dry auxiliary contacts Manual override with Allen key Position visual indicator
110-240vAC	Failsafe	21.9	125mA	10.19	0.5	240v / 0.4A	Anti-condensation heater Electrical connection: 1 x PE M12 + 0.5m cable

ABV12S ABV14S ABV20S ELECTRIC ACTUATOR

FEATURES

The ultra-compact ABV electric actuator is intended for electric actuation for on/off control with ¼ turn (90 degree) for valves with a torque of at most 15 Nm. Power is supplied via 2 wires for failsafe return via capacitor or 3 wire control for power open / power close function. With compact construction and strong ABS plastic housing, low power low heat and multi voltage technology it is ideally suited for motor actuation for small and medium diameter ball valves and has IP67 ingress protection for indoor use and possibly outdoors under shelter.

AVAILABLE MODELS

Supply voltages: 12-24vDC and 110-240vAC

LIMITS OF USE

IP Ingress Protection	IP 67
Ambient Temperature	-15°C / +60°C
Cycle Duty	100%

MECHANICAL FEATURES

Gear Box	Treated steel pinions
Torque	16.3 to 27 Nm
Angle of rotation	90° +/- 2°
Operating time	11 seconds maximum
ISO 5211:	F03 / F05 – star 11.4mm
Declutching	Without
Override control	Using a hex key
Weight	1.000 kg

ELECTRICAL FEATURES

Starting Power	230vAC: 125mA	12vDC: 3.3A
Overheating	Thermal protection	
Limit switches	2 adjustable switches	
Auxiliary switches	2 dry contacts	
Anti-condensation	Included	
Electrical connection	PE M12 + 0.5-meter cable, Optional 3, 5 and 10+ meter

ACTUATOR DIMENSIONS (mm)

ABV12S ABV14S ABV20S ELECTRIC ACTUATOR

WIRING DIAGRAM - FAILSAFE RETURN

Wire Colour		Wiring
RD	Red	+ve Power
BK	Black	-ve Power
GR	Green	Auxiliary switch "Open"
YW	Yellow	Auxiliary switch "Closed"
WT	White	Common contact

Failsafe Control: Power ON valve moves then Power OFF valve returns to start position.

Failsafe require 30 second Power On after moving to recharge the Farah capacitors.

WIRING DIAGRAM POWER OPEN / CLOSE

	Wire Colour	Wiring
RD	Red	+ve Power
GR	Green	Power valve opens Remove power valve closes
BK	Black	-ve Power
BL	Blue	Auxiliary switch "Open"
GY	Grey	Auxiliary switch "Open"
YW	Yellow	Auxiliary switch "Closed"
WT	White	Auxiliary switch "Closed"

3 Wire Control: Connect Power Red & Negative Black

Power to Green - Valve moves, remove power from Green - Valve Returns.

SWITCH SETTING

The cams are attached to the drive stem.

Clockwise rotation = valve closing. The micro-switch stops the actuator.

Anti-clockwise rotation = valve opening. The micro-switch stops the actuator.
